VeriPerf™

Assessing and implementing HSE best practices in multi-site companies

BUSINESS CHALLENGE

To fulfill HSE (Health, Safety and Environment) commitments, international companies now tend to deploy centralized corporate HSE policies across their worldwide networks. Due to organizational complexity, it is a considerable challenge to assess the implementation of HSE measures, and monitor the performance of each site, while minimizing risks and optimizing expenditure.

SOLUTION

What is VeriPerf™?
VeriPerf™ is a special service developed by Bureau Veritas to help large companies customize HSE standards according to their corporate policy.
Based on questionnaires and scoring systems, VeriPerf™ covers all aspects of management, production and monitoring. Results are presented in a form which facilitates decision-making and communication.
Bureau Veritas mobilizes local experts to audit all sites at competitive cost.
Both English and the local language are used to fully understand workers' concerns.

What are the key benefits?
- Objectively compare HSE performance of different sites in relation to corporate objectives;
- Communicate obligations and performance;
- Identify and share best practices;
- Develop corporate policy to encourage continual improvement;
- Demonstrate awareness of local regulations;
- Reduce expenditure by employing cost-effective solutions;
- Improve business reputation and competitiveness.

Move Forward with Confidence

OUR APPROACH

VeriPerf™ consists of several individual and combined modules including safety, environment, training, critical activity security, and food safety.
Bureau Veritas adapts modules to suit your specific business and appoints a dedicated team of local auditors and a project manager, who will implement VeriPerf™ in three stages:

Stage 1 – Audit support
Support is defined via interviews with managers in charge of QHSE policy, adaptation of audit references and creation and training of specialized audit teams.

Stage 2 – Site audits
Auditing, reporting of Key Performance Indicators, and establishment of action plans for improvements on a site by site basis.

Stage 3 – Summary and Presentation
Performance comparisons and HSE strategy recommendations.

Bureau Veritas experts will provide full assistance and help you implement the correct measures throughout the process.

FAQ

How does Bureau Veritas manage HSE performance assessments of sites in different countries?
Bureau Veritas mobilizes its local experts to assess the HSE performance of sites in different countries according to predefined corporate HSE standards.
Our auditors use an exclusive online reporting system (BVnet) to centralize all assessments, in order to compare and benchmark worldwide practice of your corporate policy.

How can VeriPerf™ help optimize HSE expenditure?
By assessing the performance of each site, VeriPerf™ helps you identify the activities that generate the most serious accident, legal and financial risks.
VeriPerf™ also indicates the top 3 and bottom 3 sites in terms of performance. Investments can then be targeted to improve HSE performance and reduce risks on specific sites.
Once best practices have been identified they can be transmitted throughout your worldwide network.

CASE STUDY

Airbus
Bureau Veritas was appointed by Airbus to help deploy their environmental management system across all 16 of their European sites. A 10-strong team of experts with guiding and reporting structures in Spain, France, Germany and the UK was created to adapt the VeriPerf™ 'Environment' module to Airbus specifications.
Environmental regulations and local constraints were respected throughout the whole project.
