BUREAU VERITAS
Move Forward with Confidence

Aviation technical assistance

Our assessment for optimum management of your risks

BUSINESS CHALLENGE

Airlines, banks, export credit agencies, lessors, investors and insurers are all concerned about minimising their asset risk and protecting the integrity and value of their aircraft. Insurers need the opinion of an independent third party in situations where compensation is to be paid.

SOLUTION

What is Aviation Technical Assistance?

Bureau Veritas provides:

- Technical inspections and aircraft assessments.
- Insurance after-loss expertise.
- On-site maintenance monitoring engine shop visits.
- Digital conversion of technical records.
- Assistance with the change of registration.
- Assistance with the setting, review or interpretation of technical clauses in transactional documentation (lease agreement, sale/ purchase, etc.).
- Assembly line inspections.
- Review of estimates for repair and maintenance work.

What are the key benefits?

- Having an independent, qualified technical opinion.
- Managing the risks inherent in aircraft transitioning and registration changes.
- Having concise technical information presented to make decisions as part of a transaction.
- Identifying, preventing, and managing technical risks.
- Managing the transition periods in the aircraft life cycle: lease return, sub lease, repossession, etc.
- Receiving advice about the validity of proposed compensation payments.

WHY CHOOSE BUREAU VERITAS ?

- Over 80 years of participation and support with all of the aviation industry players.
- Over 80 years of experience in managing issues associated with aircraft airworthiness.
- Bureau Veritas is an independent third party which does not own, lease or finance any aircraft.
- Technical expertise on many types of aircraft.
- Know-how in fact-finding and investigation.
- Worldwide coverage: Bureau Veritas has 700 offices and laboratories covering more than 140 countries.

Move Forward with Confidence

OUR APPROACH

- Define the overall needs of our clients in close cooperation with key personnel.
- Propose turn-key, integrated solutions.
- Implement the Scope of Services using dedicated and responsive teams with a project manager.
- Interim progress reports and a final report at the end of the project.
- Continuous monitoring of our services by appointed relationship managers.

FAQ

Are you able to schedule out periodic aircraft fleet inspection programmes?
Yes, Bureau Veritas has developed and implemented periodic aircraft inspection programmes for a number of our clients including investors, lessors and export credit agencies.

Does your expertise cover only public transport aircraft?
No, our expertise is broad and covers public transport aircraft (from regional transport planes to large carriers), general aviation and business aircraft, helicopters and specialist services to the oil and gas industries.

Are you able to assist your clients during transaction negotiations?
Yes, we act as a technical advisor for our clients at any stage during transaction negotiations. We represent and defend the best interests of our customers. We work in tandem with the client's legal and / or financial advisors or we can recommend such advisors to you.

What do you provide that is more than just a traditional insurance assessment?
Our many in house experts, with recognised experience in aviation transport, provide you with their expertise in all areas of aircraft airworthiness.
