AS/EN/JISQ 9100 certification

Demonstrating your company's commitment to quality in the aeronautics industry

BUSINESS CHALLENGE

Perhaps no other industry is as obsessively safety-conscious as the Aeronautics industry. Constantly under public scrutiny, and with little margin for error, strict quality control standards are now considered standard in every corner of the industry. In an extremely competitive global landscape, almost all the successful manufacturers, suppliers and service providers today regard quality management as their fundamental driving force. To demonstrate this commitment, however, requires independent certification. It is irrefutable evidence that quality standards are being met. Such certification can mean winning new contracts, or being excluded.

SOLUTION

What is AS/EN/JISQ 9100 certification?
AS 9100 is the internationally recognized quality system standard specific to the Aeronautics industry. Known as AS 9100 in North America, EN 9100 in Europe and JISQ 9100 in Japan, the standard is strongly supported and adhered to by major aeronautics manufacturers including Airbus, Boeing, GEAE and Rolls-Royce. Indeed, AS 9100 certification has already become the basic requirement demanded by all these companies to their suppliers. Based on ISO 9000 requirements, AS 9100 puts a particular focus on quality, safety and technology in all disciplines throughout the industry, and along the entire supply chain. It applies to every domain whether civil or military.

What are the key benefits?

- Confirmation that your production and operational systems meet the internationally recognized standard
- Recognition for your company, leading to improved business opportunities
- Fulfilment of mandatory requests from players such as Boeing, Airbus, GE and Snecma
- Confidence of your customers who trust the independent third party audit, often eliminating the need for a second party audit
- Easy search facility on the OASIS database, to check whether a company has already been certified, or for others to check the status of your company.

WHY CHOOSE BUREAU VERITAS CERTIFICATION?

Expertise ■ Bureau Veritas Certification is a worldwide leader with over 80,000 certified companies in more than 100 countries.

Network ■ We operate in more than 100 countries. This global presence means that our clients can receive the double advantage of international expertise combined with a genuine depth of local knowledge.

Business understanding ■ Dedicated and specialized auditors with an aerospace industry background, we understand your issues and deliver a certification service that is meaningful to your business and your customers.

Mark of global recognition ■ The Bureau Veritas Certification Mark is a globally recognized symbol of your organization's ongoing commitment to excellence, sustainability and reliability.

AS 9100 BUREAU VERITAS Certification

Combined services ■ Bureau Veritas Certification offers the possibility of combined certifications to the largest range of recognized standards, bringing consistency, optimization and efficiency.

RELATED SERVICES

In addition to AS/EN/JISQ 9100 certification, Bureau Veritas Certification also offers services that include:

- Second party audits
- Internal audits
- Training

Integrating standards
AS/EN/JISQ 9100, ISO 9001, ISO 14001, OHSAS 18001 and SA8000 are built to be compatible. Bureau Veritas Certification offers the possibility of integrated certification services (Quality, Health & Safety, Environment and Social Responsibility). This delivers greater audit efficiency, consistency and optimization.

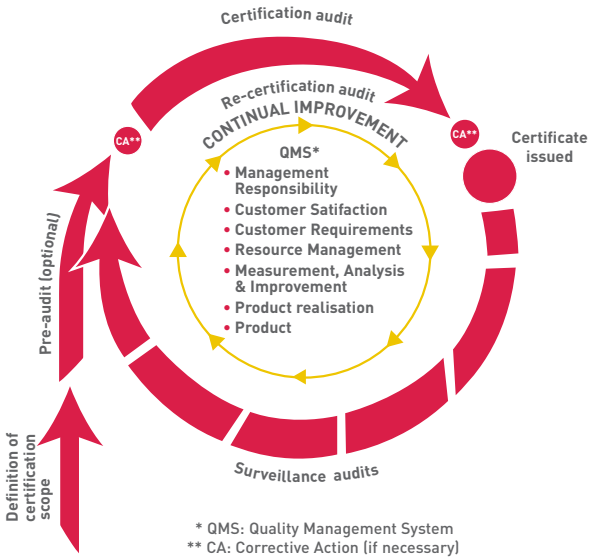
AS 9100
BUREAU VERITAS
Certification

- Definition of certification scope;
- Pre-audit (optional): gap analysis and diagnosis of your current position against the standard;
- Certification audit (certificate issued);
- Surveillance visits to follow the continual improvement;
- Re-certification after 3 years through full audit or continual assessment;
- Following each step a straightforward and complete report is delivered promptly allowing your company to continually improve its quality management performance.



FAQ

To which industries do the AS/EN/JISQ 9100 family of standards apply?

AS/EN/JISQ 9100 is applicable to the whole supply chain, not only in the aeronautics manufacturing industry, but also in equipment design and fabrication, operation of airports and airways, supply and maintenance of spare parts, flight operation and goods processing.

- EN/AS/JISQ 9100 is applicable to companies producing new materials, parts and other materials.
- EN/AS/JISQ 9110 is applicable to companies carrying out maintenance and repairs.
- EN/AS/JISQ 9120 is applicable to stockists and resellers.

Which organizations are behind the standard?

The AS/EN/JISQ 9100 series of norms and the procedures for application have been passed by the IAQG (International Aerospace Quality Group) and, for Europe, by the EAQG (European Aerospace Quality Group) and ASD (AECMA-EASE).

CLIENT REFERENCES
