

Bureau Veritas is one of the world leaders in conformity assessment and certification for quality, health, safety, environment and social responsibility (QHSE), with a commitment and expertise from women and men in 140 countries. Join the technical and innovative excellence of our teams to belong to a group recognized for more than 180 years for its quality of service and its ethical commitment to sustainable development.

MISSION

Bureau Veritas Marine & Offshore (M&O) has embarked on major transformation projects aimed at improving internal productivity and customer service. These projects are based on innovations in digital technologies, information systems redesign and operational excellence initiatives.

M&O is a pioneer in offering client-centric, robust business solutions based around its applications and is an acknowledged leader amongst the peers. Based on the growing demands for these solutions, it is setting up an extended applications development and support team in Mumbai office. This team will handle its existing applications portfolio in terms of ongoing support and maintenance, develop and deliver solutions for new initiatives and also participate in application modernization program.

Towards this, Bureau Veritas is looking for highly skilled developers to contribute towards these initiatives within M&O vertical. The work entails setting up efficient development and support teams in Mumbai, starting with work transition from onsite locations.
